Subject: Application for Fall 2024 Data Engineering Intern

Dear Laurence/Sebastien,

I am writing to express my heartfelt interest in continuing my Data Engineering internship with Intact for the Fall 2024 term. Over the past couple of weeks, I have genuinely enjoyed being a part of Intact's dynamic team, and I am eager to continue contributing to our shared success.

During my time here, I have had the privilege of working on impactful projects, particularly within the insurance rating algorithm team. This experience has not only enhanced my technical skills but also deepened my commitment to the important work we do. I have been involved in developing an automated ETL pipeline and collaborating on Kafka-based data streaming solutions. These projects have given me a profound appreciation for the innovative spirit and dedication that define Intact.

I understand that you are considering other candidates for the upcoming term, but I believe my existing knowledge of our projects, my established relationships with the team, and my passion for our work make me uniquely qualified to continue in this role. I am deeply committed to Intact's mission and am eager to further contribute to our goals.

The collaborative and supportive environment at Intact has been instrumental in my professional growth. I have built strong connections with my colleagues and have felt truly valued as a team member. Continuing my internship here would allow me to further develop these relationships and contribute even more meaningfully.

Thank you for considering my request to continue my internship. I am passionate about the work we are doing and am excited about the possibility of contributing further. I am confident that my ongoing involvement will be beneficial for both myself and the team.

Sincerely,
Numan Salim Shaikh
